JavaScript

Responsive Design

React.js

Tailwind CSS / Bootstrap

Node.js

Express.js

MongoDB

Mongoose

REST API Development

JWT / OAuth

Postman / Thunder Client / Insomnia

Git & GitHub, Nodemon, CORS & Middleware Handling

### 🎓 EDUCATION

#### **Bachelor of Computer Applications**

Sutex Bank College of Computer Applications  
& Science

07/2022 – 04/2025 | Surat, India

#### **Higher Secondary Certificate(HSC), Commerce Stream**

Vasishtha Vidhyalaya

06/2021 – 04/2022 | Surat, India

### 📄 SUMMARY

I'm currently working as a MERN Stack Developer at Sahil InfotechTM, where I develop modern, full-stack web applications using MongoDB, Express.js, React, and Node.js. My work involves building dynamic user interfaces, creating RESTful APIs, managing databases, and ensuring efficient backend logic. I'm skilled in using tools like Git, GitHub, Postman, and npm, and I follow best practices for clean code, testing, and performance optimization. I collaborate closely with designers and other developers to deliver high-quality, scalable solutions.

### 💼 PROFESSIONAL EXPERIENCE

#### **Sahil InfotechTM**

Mern-Stack Developer

12/2024 – present | Surat, India

As a MERN Stack Developer at Sahil Infotech in Surat, India, since December 2024, I design and build modern full-stack web applications using MongoDB, Express.js, React, and Node.js. My responsibilities include developing responsive frontends, integrating dynamic APIs, and managing backend logic and databases. I collaborate closely with UI/UX teams to transform designs into high-performance user experiences. I also handle version control with Git, conduct testing using Postman, and focus on optimizing application performance. Working alongside cross-functional teams, I ensure clean code, scalable architecture, and smooth project delivery tailored to diverse client needs across various industries.

#### **BlackBugs Technologies**

React Developer

05/2024 – 11/2024 | Surat, India

With 6 months of React internship experience, I've gained hands-on skills building dynamic and fast web apps using React.js. During this time, I worked on creating reusable components, managing app state with Redux and Context API, and connecting apps to RESTful APIs. I enjoy using React hooks and lifecycle methods to make apps smoother and more efficient. I'm also comfortable with frontend tools like Webpack and Babel, and have used Styled-Components to build responsive, stylish designs. This internship helped me grow my skills and gain valuable real-world React development experience.
